LEVERAGING LTFS TAPE FOR ACTIVE ARCHIVING

StrongLink

01 FREE UP USABLE PRIMARY STORAGE CAPACITY

02 REDUCE BACKUP PROCESS TIME AND COSTS

03 MAKE YOUR STORAGE MANAGEMENT DEAD SIMPLE

OPTIMIZE YOUR STORAGE TO SAVE BIG

StrongLink® provides a NAS connection to a wide variety of scalable Tape Libraries. It quickly enables a simple, low cost, and reliable method of writing and retrieving data to an active archive, harnessing the best attributes of disk and tape. You can immediately store, search, access and retrieve data on low-cost tape storage through a completely hardware agnostic appliance that works with almost any LTFS drives and libraries.

MEET THE FASTEST LTFS NAS IN THE WORLD

Network storage connectivity is provided through CIFS/NFS and S3 protocols enabling support for both file and object storage on tape. The StrongLink management console makes it simple to control and set the perfect amount of data protection and performance for your active archive.

AUTOMATE MANAGEMENT WITH WORKFLOW POLICIES

With StrongLink LTFS NAS, you have the possibility to set it and forget it. StrongLink is fully automated and tape becomes as seamless and transparent as an individual HDD. Gone is the management and handling of individual tapes like you've experienced during traditional backup.

NEARLINE / ARCHIVE USE CASE

1. DRAG & DROP (OR AUTOMATE THE OPERATION WITH THE DATAMANGER OR STRONGLINK)

SMB NFS S3

SSD

STRONGLINK SUPPORTS 256 UNIQUE SHARES & WORKFLOW

STORAGE MEDIA LIBRARY

USER'S FILES

2. NFS OR SMB BASED FILED SYSTEM

3. SSD OR HHD USED FOR CACHING STORAGE

4. AUTOMATED POLICIES CONTROL FILE MANAGEMENT TO TAPE, AND DEFINE DATA PROTECTION REQUIREMENTS (NUMBER OF COPIES)
